

Please DO NOT pass petition 04-160! We are paying customers for the service XM Radio presents to us and it would be a violation of our constitutional rights for this issue to pass! Public radio will never be replaced! For those of us that wish to have radio through the use of 21st century technology, FOR A FEE, we should be able to have it. We are living in the information age for a reason, and with XM providing weather and traffic locally, we as citizens are getting what we need. This may also benefit people in other ways by preventing deaths because of accurate and quick notification of a fast developing storm. It may also help traffic jams and car accidents to be reduced due to real time information. Please do not stop this service that we as Americans are entitled to!
